Cinnaminson Township
NJDEP MS4 (Watershed Inventory Report)
Fact Sheet
November 9, 2026

Cinnaminson Township (and all NJ municipalities) are permitted to manage and treat municipal stormwater under **NJ MS4 (Municipal Separate Storm Sewer System (MS4))** municipal permits, including but not limited to stormwater design, collection, treatment, infrastructure and maintenance activities required per permit.

To meet its permit obligations, Cinnaminson Township (and all municipalities) were required to prepare and file an **MS4 (Watershed Inventory Report)** with the NJDEP. An interim draft of this WIP Phase 1 assessment report was completed for Cinnaminson Township and filed prior to the January 1, 2026 regulatory deadline.

A copy of the Phase 1 assessment report is available for public review on Cinnaminson Township Township's stormwater webpage:

Stormwater – Cinnaminson Township

This current (draft) report will be modified to include additional storm water infrastructure data (also obtained for Cinnaminson Township) and review comments and input from the NJDEP, Cinnaminson Township staff and the public.

As part of the permit process, two (2) semi-annual public meetings are required to make the public aware, and to solicit questions or comments regarding the WIP plan.

Questions or comments regarding the WIP report may be directed to Cinnaminson Township's Stormwater Coordinator (contact information below):

RBrevoge@ardurra.com

Two future additional phases of the WIP reporting will be necessary – the Watershed Assessment Report (due January 1, 2027) and the Watershed Improvement Plan Report (due December 31, 2027). Additional information on both of these (future) plans will be provided by NJDEP.
